QUESTION 1

You create a new Work Manager to control how server threads are allocated to an application's increasing requests. You want to further configure the criteria of the Work manager by using a Request class.

Identify three valid Request classes that you can to a work manager.

- A. Uniform Distribution Request class
- B. Response Time request class
- C. Max Throughput Request class
- D. Fair share Request class
- E. Context Request class

Correct Answer: BDE

QUESTION 2

You set up two network channels for server -to-server communication. You want channel x to be used more than channel Y, so you give channel x a higher channel Weight. You want to see if indeed channel X is used more.

You use the administration console and look at both channels under each one's Monitoring tab. What scenario would best assure you that channel x has an overall higher connection rate?

- A. Channel X Bytes Sent is higher.
- B. Channel X Bytes Received is higher.
- C. Channel X Accept Count is higher.
- D. Channel X Connections is higher.

Correct Answer: D

QUESTION 3

The Configuration Wizard has a Node Manager option which, if selected, allows you to also configure a Node manager as you create your domain.

Select two true statements about using the Configuration Wizard to configure Node Manager. (Choose two.)

- A. You are required to enter the username and password for accessing Node Manager
- B. You are allowed to choose the location of the Node Manager home

- C. You can select either the Java-based or script-based Node Manager
- D. After the Configuration Wizard creates the domain, it automatically starts the configured Node Manager

Correct Answer: AD

QUESTION 4

You see a script called start WebLogic.sh(.cmd in Windows) in the root folder of your domain.

What does this script do?

- A. Starts a machine
- B. Starts Node Manager
- C. Starts a Managed server
- D. Calls the startwebLogic.sh script in the domain\\'s bin directory
- E. Calls the startManagedWebLogic.sh script in the domains bin directory

Correct Answer: D

QUESTION 5

All administrators that deal with the production domain in your organization are extremely experienced. As the lead administrator, you have been asked to change the administration console preferences for all administrators so that inline help no longer displays, since no one needs it.

Select the true statement about this scenario.

- A. There is nothing you can do since inline help cannot be disabled.
- B. There is nothing you can do for all users, since disabling inline help must be done per user.
- C. Log into the administration console and disable Inline help under "help."
- D. Access WLST, connect to the domain\\'s admin server, and use the command enable inline help (false).

Correct Answer: C
