**QUESTION 3**

Refer to the exhibit.

An administrator is about to add the FortiGate device to FortiManager using the discovery process FortiManager is

operating behind a NAT device, and the administrator configured the FortiManager NATed IP address under the FortiManager system administration settings

What is the expected result?

- A. During discovery FortiManager sets the FortiManager NATed IP address on FortiGate
- B. During discovery FortiManager sets both the FortiManager NATed IP address and NAT device IP address on FortiGate
- C. During discovery FortiManager sets the NATed device IP address on FortiGate
- D. During discovery FortiManager uses only the FortiGate serial number to establish the connection

Correct Answer: C

---

#### QUESTION 4

What will happen if FortiAnalyzer features are enabled on FortiManager?

- A. FortiManager will reboot
- B. FortiManager will send the logging configuration to the managed devices so the managed devices will start sending logs to FortiManager
- C. FortiManager will enable ADOMs automatically to collect logs from non-FortiGate devices
- D. FortiManager can be used only as a logging device.

Correct Answer: A
